

RGB Skew Corrector

VGA SKEW TUNER

VSKU-215 (200M)

VSKU-315 (300M)

The VGA SKEW TUNER offers perfect skew delay correction. It is designed to correct images with colors that have become skewed or shifted due to lengthy Cat5 / 5e / 6 cable runs. Skew delay extends as the length of the cable increases. When transmitting distances over 60 meters, the VGA SKEW TUNER is the best solution to correct the skew of all RGB colors. Furthermore, it is compatible with all Rextron Video Extenders.

Features

- Compact Size
- Economical, durable and dependable
- Support 200M / 300M RGB Skew Correction
- Digitally saves settings and memorizes last state
- Unique and excellent technique to adjust RGB colors by only 2 steps
